ABHISHEK SHAJU

Python Full Stack Developer

Kozhikode, Kerala, India | +91 9544399856 | abhishekshaju116@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience across three internships, independently owning three production-style Django applications end-to-end — from data modeling and REST API design to deployment. Builds role-based, multi-panel systems on Django's MVC/MVT architecture with a strong focus on clean data modeling, session-based authentication, and maintainable code. Combines full-stack delivery (Python, Django, JavaScript, PHP) with applied machine-learning foundations (scikit-learn, classification, regression) and a track record of shipping complete, end-to-end products rather than isolated features.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, PHP, HTML5, CSS3, SQL
- **Frameworks & Libraries:** Django, Django ORM, Django REST Framework (DRF), Flask, OpenCV, Bootstrap
- **Architecture & Concepts:** MVC/MVT Architecture, RESTful API Design, CRUD Operations, Authentication & Session Management, Database Design, Agile/SDLC, Responsive Web Design
- **Databases:** MySQL, SQLite, MongoDB
- **Machine Learning:** Linear Regression, Classification, Decision Trees, Scikit-learn
- **Tools & Platforms:** Git, GitHub, REST API Development (Postman), VS Code, Vercel

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern Jan 2026 – Present

Trycode Innovations, Kozhikode, Kerala

- Independently developing and owning three production-style Django applications end-to-end as part of the internship — SignSync, RePlate, and MediByte — covering front-end design, database architecture, REST API design, and deployment (see Key Projects below).
- Collaborating within a multi-panel, role-based architecture pattern (Admin, Donor/Doctor, User) across projects, applying consistent session-based authentication and responsive UI conventions.

AI & ML Intern Dec 2024 – Jan 2025

EduTantr, Bangalore

- Completed a hands-on ML training program covering 3 core supervised learning techniques: Linear Regression, Classification, and Decision Trees.
- Applied ML concepts in practical exercises to build a working understanding of model training, evaluation, and prediction workflows.

Full Stack Developer Intern 2023

CodeBind Technologies, Coimbatore

- Built responsive front-end pages (HTML, CSS, JavaScript) and server-side logic in PHP, gaining early full-stack exposure.

KEY PROJECTS

SignSync | Django, OpenCV, Scikit-learn, Computer Vision

- Real-time sign language recognition web app that converts webcam-captured hand gestures into text through a 4-stage pipeline (acquisition, preprocessing, recognition, output); trained and integrated an ML classification model for real-time gesture recognition with no manual input.

RePlate | Django, Django ORM, Bootstrap, SQLite

- Full-stack food donation platform with 7 interlinked Django ORM models across Admin, Donor, and User roles; built a fetch-based order flow with CSRF-protected requests, server-side stock validation, a notification system, and an admin activity feed aggregating live data across 3 database tables.

MediByte | Django, Bootstrap, Role-Based Access

- Django-based healthcare coordination platform unifying Patient, Doctor, and Admin panels under one design system, with appointment scheduling, medical records, and complaint/feedback workflows.

CERTIFICATIONS

Generative AI & LLM (DeepLearning.AI, Coursera) • AI & Machine Learning (EduTantr) • Web Development (CodeBind Technologies) • AI Tools (Be10x) • Excel Mastering & MongoDB (GUVI) • Industry 4.0 & IIOT (NPTEL)

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science 2022 – 2026

Excel Engineering College, Namakkal, Tamil Nadu | CGPA: 7.00 / 10
