ABHISHEK SHAJU

Python Full Stack Developer

Kozhikode, Kerala, India | +91 9544399856 | abhishekshaju116@gmail.com | linkedin.com/in/abhishek-shaju-95a051258 | github.com/Abhish3kSh4ju

PROFESSIONAL SUMMARY

Python Full Stack Developer with practical experience across three internships, building and deploying web applications using Django, REST APIs, and SQL/NoSQL databases. Currently building three production-style applications at Trycode Innovations — SignSync (real-time computer vision), RePlate (food donation platform), and MediByte (healthcare coordination platform) — covering the full development lifecycle from front-end design to database architecture and deployment. Combines hands-on machine learning foundations with strong problem-solving skills and a record of independently shipping complete, end-to-end projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, HTML5, CSS3
Frameworks & Libraries: Django, Flask, OpenCV, Bootstrap
Databases: MySQL, SQLite, MongoDB
Machine Learning: Linear Regression, Classification, Decision Trees, Scikit-learn
Tools & Platforms: Git, GitHub, REST API Development, VS Code, Postman
Concepts: Full Stack Development, MVC Architecture, Database Design, Agile/SDLC, Responsive Web Design
Professional Skills: Problem Solving, Team Collaboration, Time Management, Adaptability, Communication

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern — **Jan 2026 – Present**
Trycode Innovations, Kozhikode, Kerala

- Develop SignSync, a real-time sign language recognition web app (Django + OpenCV) that converts webcam-captured hand gestures into text through a 4-stage pipeline: acquisition, preprocessing, recognition, and output.
- Train and integrate a machine learning classification model to recognize hand gestures in real time with no manual input required.
- Build RePlate, a full-stack food donation platform (Django, HTML, CSS, Bootstrap, SQLite) connecting donors with recipients to reduce food wastage.
- Design and implement 3 role-based modules for RePlate (Admin, Donor, User) covering food listings, requests, order tracking, complaints, and feedback.
- Build responsive dashboards tailored to each of RePlate's 3 user roles, improving usability and task completion for each workflow.
- Build MediByte, a Django-based healthcare platform connecting patients and doctors digitally.

AI & ML Intern — **Dec 13, 2024 – Jan 13, 2025**
EduTantr, Bangalore

- Completed a hands-on ML training program covering 3 core supervised learning techniques: Linear Regression, Classification, and Decision Trees.
- Applied ML concepts in practical exercises to build a working understanding of model training, evaluation, and prediction workflows.

Full Stack Developer Intern — **2023**
CodeBind Technologies, Coimbatore

- Built and styled responsive web pages using HTML, CSS, and JavaScript, focused on interactive front-end functionality.
- Developed server-side logic and dynamic features using PHP, gaining full-stack exposure early in my development career.

PROJECTS

MediByte — Doctor-Patient Healthcare Coordination Platform

- Full-stack healthcare platform (Django, HTML, CSS, JavaScript, Bootstrap, SQL) connecting patients and doctors to communicate, manage medical information, and share test results digitally.

SignSync — Real-Time Sign Language Recognition System

- Web-based platform (Django + OpenCV) that detects hand gestures via webcam and converts them to readable text using a trained ML classification model.
- Built a 4-stage real-time pipeline: image acquisition, preprocessing, gesture recognition, and text output generation.

RePlate — Food Donation & Management Platform

- Full-stack web app (Django, HTML, CSS, Bootstrap, SQLite) connecting food donors with people needing surplus food to cut food wastage.
- Built 3 role-based modules (Admin, Donor, User) supporting listings, requests, order tracking, complaints, and feedback.

CERTIFICATIONS

Generative AI & LLM (DeepLearning.AI, Coursera) • AI & Machine Learning (EduTantr) • Web Development (CodeBind Technologies) • AI Tools (Be10x) • Excel Mastering & MongoDB (GUVI) • Industry 4.0 & IIOT (NPTEL)

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science — **2022 – 2026**
Excel Engineering College, Namakkal, Tamil Nadu | CGPA: 7.00 / 10
